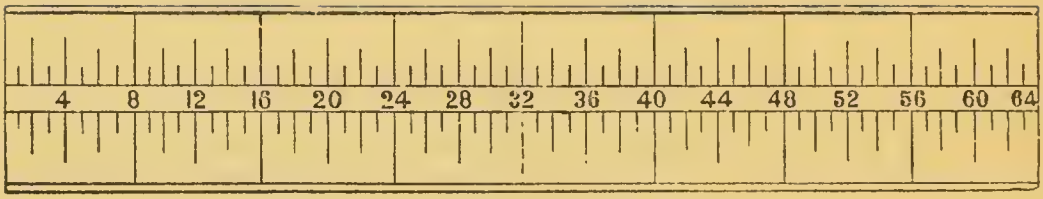
Times Building, Philadelphia.

T. R. MARVIN & SON, NUMISMATIC PRINTERS, BOSTON.

1879.



THE AMERICAN COIN SCALE.

INTRODUCTION.

In the interest of gentlemen who are commencing collecting — and their number is increasing from day to day — the following notes will be proper.

A sale of coins is managed like the sale of any other merchandise. The descriptive catalogue gives a general idea of type and condition, and the coins themselves are on exhibition in the morning of the days of sale, so that they may be examined by the amateur or his agent, thus avoiding reclamations after the sale, on account of possible mistakes in the cataloguing.

The coins are sold for cash to the highest bidder, by single undivided lots as described in the catalogue; the bid to be at so much a piece or the set. Collectors unable to be present at the sale, may have their bids faithfully executed by the auctioneers, or any respectable dealer in coins, Cash On Delivery, or according to their special agreement, paying a slight commission on eventual purchases only, if any.

If the size of a piece is indicated, it is by sixteenths of an inch. The term "White Metal" refers to a composition of copper, lead, and tin, or tin and nickel, in appearance brilliant white like silver, which, if carefully handled, will remain bright for years to come.

The present catalogue, prepared with usual care, but of course not infallible, contains such a miscellaneous line of coins, medals, &c., that every collector will doubtless find one or another piece which he would like to have. I shall be thankful for the smallest bid, and again rely upon the kind assistance of my friends, brother numismatists, and collectors in general.

My thanks to all for favors.

S. K. HARZFELD.

Philadelphia, Times Building, May 17, 1879.
